

NAAD[®]

Keeps the Heat Away

AIR **BUBBLE** INSULATION

NAAD INDUSTRIES PVT. LTD.

NAAD® INSULATION

NAAD® INDUSTRIES PVT. LTD.

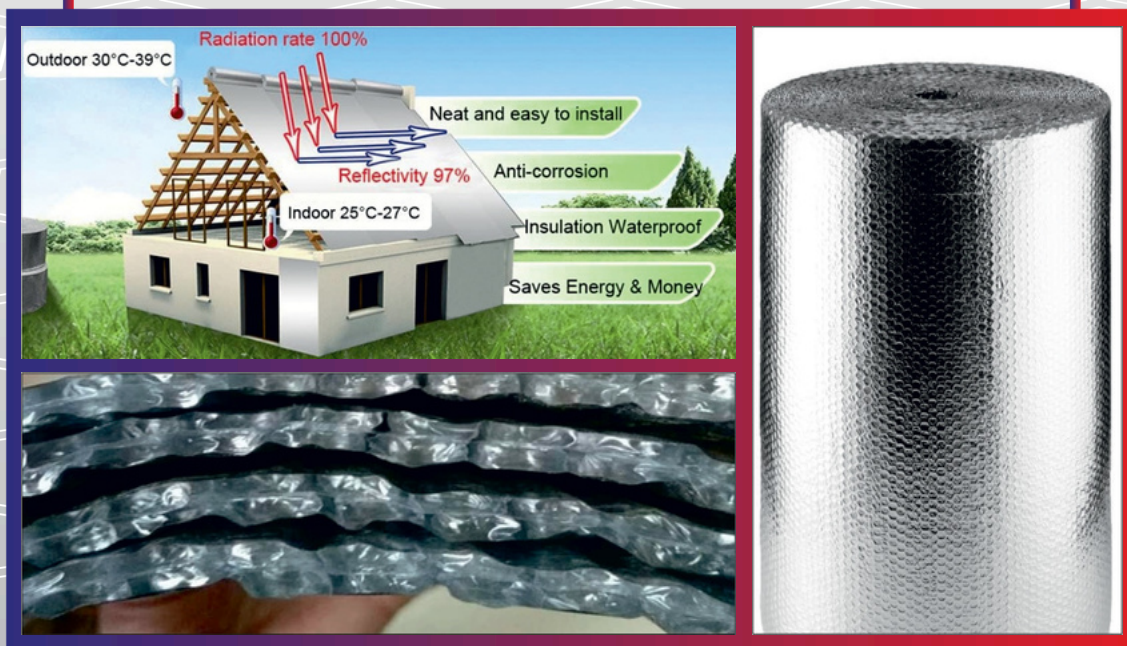

SUN Group is a respected, well recognised Indian brand and proud to be one of the nation's leading private enterprise head quartered in Rajnandgaon. Its business include Insulation, Geosynthetic and Textile.

Now the group has started manufacturing of **NAAD®** Air Bubble Insulation with the state of art technology and manufacturing facility .

NAAD® Air Bubble Insulation is one of the most important system components in a roof, creating a comfortable environment inside the building by protecting it from heat and cold while also helping to reduce heating and cooling energy costs. The importance of bubble insulation has increased recently mainly due to changing insulation standards worldwide, which put higher demands on the thermal resistance of building structures to reduce energy loss for heating or cooling.

NAAD® Air Bubble Insulation is not only for Energy Conservation, but in many circumstances is to protect the working environment of employees, and may also be to ensure critical process temperatures are achieved. Insulation in your home provides resistance to heat flow and lowers your heating and cooling costs and also improves comfort.

WATER PROOF + EASY TO USE + LIGHT WEIGHT + RADIANT BARRIER + ECO FRIENDLY + SAVE ENERGY

NAAD[®] INSULATION

WHY NAAD[®] AIR BUBBLE INSULATION

NAAD Air Bubble Insulation provides excellent thermal insulation to Pre-Engineered Buildings with extra benefits of water proofing and good insulation properties.

To maintain comfort, the heat lost in the winter must be replaced by your heating system and the heat gained in the summer must be removed by your cooling system. Properly insulating your home will decrease this heat flow by providing an effective resistance to the flow of heat.

The products are highly admired by the customers for their long service life, easy to use, high quality and excellent finishing standards.

NAAD[®] AIR BUBBLE INSULATION is regularly used in many green buildings across the country.

It is a new generation material that has the ability to handle numerous insulation issues that can arise, such as heat, cold, noise and condensation.

BENEFITS :

-  Length to suit your requirement.
-  97% Radiant heat reflection
-  3% low emissivity
-  Simple & quick installation
-  Highly durable with 10 years of warranty
-  100 % recyclable
-  Light weight
-  Non toxic non itchy
-  Environment friendly
-  Cost effective

PRODUCT SPECIFICATION

Length of Roll-40m **Width of Roll** -1.2m

Thickness -4mm to 20mm

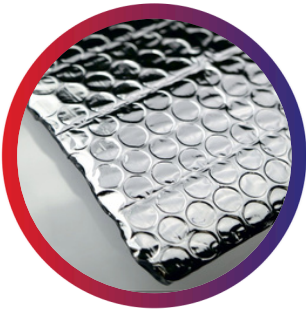

Layers -Single , Double , Triple , Quad

Facing -Aluminium foil, Aluminium foil with metalised film, White poly film, Woven aluminium film

NAAD[®] INSULATION

MONO LAYER INSULATION

NAAD[®] AM40

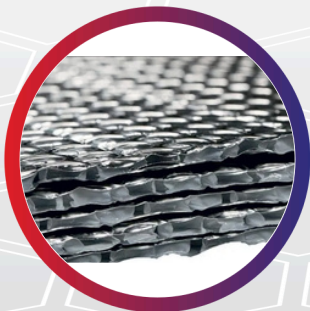

NAAD AM40 comes with a single layer of 4mm thick Bubble sheet laminated with

aluminium foil on both sides and the combination of aluminium foil with metalized film, white poly film, woven aluminium film. These films are coated with pure aluminium sheets which impart reflective properties to the overall insulation materials.

NAAD[®] AM60

NAAD AM60 comes with a single layer of 6mm thick Bubble sheet laminated with

pure aluminium foil on both sides and the combination of aluminium foil with metalized film, white poly film, woven aluminium film. These films are coated with pure aluminium sheets which impart reflective properties to the overall insulation materials.

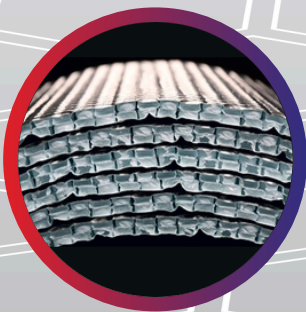

NAAD[®] AM100

NAAD AM100 comes with a single layer of 10mm thick Bubble sheet laminated

with aluminium foil on both sides and the combination of aluminium foil with metalized film, white poly film or, woven aluminium film. These films are coated with pure aluminium sheets which impart reflective properties to the overall insulation materials.

DUAL LAYER INSULATION

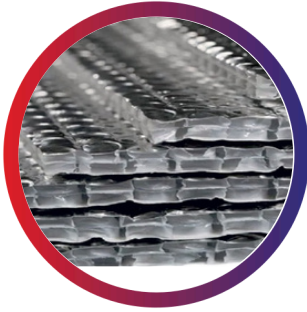

NAAD[®] AD80

NAAD AD80 comes with a double layer of 4mm thick Bubble sheet laminated

with aluminium foil on both sides and the combination of aluminium foil with metalized film, white poly film, woven aluminium film. These films are coated with pure aluminium sheets which impart reflective properties to the overall insulation materials.

NAAD[®] INSULATION

NAAD[®] AD120

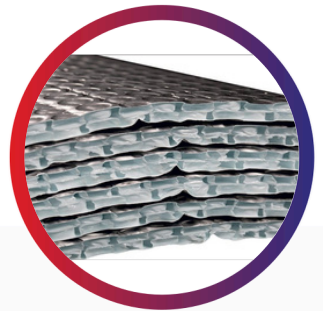

NAAD AD120 comes with a double layer of 6mm thick Bubble sheet laminated

with aluminium foil on both sides and the combination of aluminium foil with metalized film, white poly film, woven aluminium film. These films are coated with pure aluminium sheets which impart reflective properties to the overall insulation materials.

NAAD[®] AD200

NAAD AD200 comes with a double layer of 10mm thick Bubble sheet laminated

with aluminium foil on both sides and the combination of aluminium foil with metalized film, white poly film, woven aluminium film. These films are coated with pure aluminium sheets which impart reflective properties to the overall insulation materials.

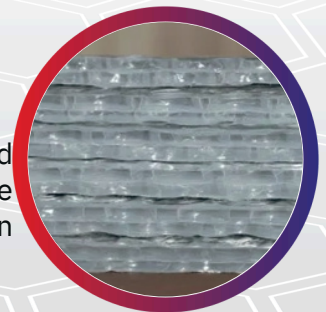

TRIPLE LAYER INSULATION

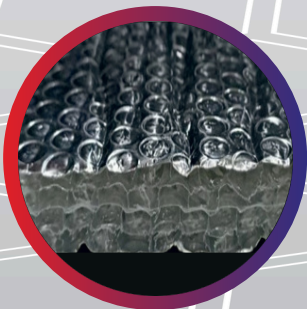

NAAD[®] AT120

NAAD AT120 comes with a triple layer of 4mm thick Bubble sheet laminated with

aluminium foil on both sides and the combination of aluminium foil with metalized film, white poly film, woven aluminium film. These films are coated with pure aluminium sheets which impart reflective properties to the overall insulation materials.

QUAD LAYER INSULATION

NAAD[®] AQ160

NAAD AQ160 comes with a four layer of 4mm thick Bubble sheet laminated with

aluminium foil on both sides and the combination of aluminium foil with metalized film, white poly film woven aluminium film. These films are coated with pure aluminium sheets which impart reflective properties to the overall insulation materials.
